Renewable Construction Enclosures

Barricades For Humanity is a refreshing, innovative, and eco-friendly solution for temporary construction enclosures. Barricades For Humanity partners with renowned charitable organizations to offer its clients a well-rounded recycling program with guaranteed, sustainable accountability.

Why rent, when you can buy and donate? A positive environmental change can be achieved by reducing carbon footprint while giving back to those in need.

After a completed cost analysis, Barricades for Humanity can not only offer an eco-friendly solution to your current barricades, but also 15-20% in savings on total barricade cost.

Benefits to our Partners

A yearly detailed analysis will be provided in regards to diversion of waste from landfill for your environmental program.

Charitable donation tax receipts, and letter of acknowledgment once per year for the donated barricade materials.

Benefits Over Modular Barricades:

-We deliver a professional, high-quality barricade by customizing its design and fit to seamlessly complement any storefront, food court, or office front.

-By purchasing rather than renting barricade material, Fashion Show Mall reduces landfill waste, and carbon footprint, while benefitting the community.

Recyclable and Donated Materials Include:

- Quality 1/2" drywall sheets
- Wooden double doors with hardware
- Drywall screws
- 3-5/8" steel studs
- Various lengths of MDF baseboard
